## grout

# Using GroutShields is an economic step to revitalizing your tile and grout

ms Michael Stracuzza

GroutShields

Constant traffic in restaurants, businesses, hospitals, schools and in our homes cause discoloration in grout making tile floors and walls look dirty and stained. Ripping down and replacing these areas can cost thousands of dollars and with the economy in a weakened state more and more businesses and homeowners are looking to save money. Many property owners may not realize that they can make their existing

tile/grout area brand new without the heavy cost and time.

These projects—whether it's a

GroutShields takes 3 to 4 hours to complete a bathroom. Floors and walls dry in 20 minutes, however, it

sealer can then be applied followed by wiping away any excess. In addition to the new appearance the grout

environmentally friendly and safe around children and pets.

When you begin a project you must consider how the area will be used and how often. Remember, grout is a porous material and even under the best conditions will become soiled and stained. Think about any special needs that your business or family may have. Tiling a kitchen backsplash is a smart move and a good investment in your home. Tile is economical and wears better than paint. It's also easier to clean. However, you're going to be living with the tile for some time, so you want to make sure it is done right.

Even though you may have planned out your project, the result may be that the grout you applied is too light. Rather than dig out the grout, you can apply any color of GuardShield on top of the existing grout and within hours you can change the look of any room.

Even if your new tile/grout color scheme is perfect, you can go one step further to assure its "brand-new state" with a clear shield that acts as a protectant.

Also, if you are simply tired of your old floors or walls, you can give them a makeover and new look by just changing the color of your grout.

Working with hotel chains and hospitals, I train their maintenance crews on how to produce professional results while installing superior durability. I have worked with school districts that are graded on the cleanliness of their bathrooms, and after using GroutShields they have gone from a Level 4 to receiving a top Level 10. It is easy to restore any tile floor or wall back to a clean, uniform look with the end result being easier maintenance and greater stain resistance.

Recognized as a leader in home repair, we have been recognized on the Do It Yourself (DIY) Network and look forward to demonstrating how to revitalize your tile/grout for the millions of Home Shopping Network (HSN) viewers this August. In fact, I am seeking to do the worst kitchen or tile/grout bathroom makeover in the United States. I want to show the public how you can completely change the look of your kitchens or bathrooms for under \$50.

When your grout or tile reaches a point where it looks dirty, dingy or you simply want to change the color revitalizing your tile area does not have to be a cumbersome project. From the average homeowner to the most experienced tile layer, it can be a simple project.
